Spanish For Guitar: Masters In TAB: Easy To Intermediate Sheet Music Solos By The Spanish Masters

Synopsis

Contains some of the most popular pieces ever written for guitar, including Malagueña, El Testamento de Amelia, Lagrima and Recuerdos de la Alhambra. Helpful playing tips and plenty of fingerings are included, making this your ultimate source for Spanish guitar pieces. Every piece is written in standard music notation and easy-to-read tablature showing exactly where each note should be played on the guitar.

Customer Reviews

This book exceeded my expectations. I didn't think for under \$8.00 I would get much but always liked spanish music. The arrangements are voiced great and sound good. The book is 9" by 12" , has 13 full songs and is easy to read the tabature. Explains very well everything about the tabs.

I bought this book as a beginner guitar player and was very satisfied with it. However, most of the arrangements are simplified versions of what you may expect. They still sound pretty good but more advanced players maybe disappointed if they are looking for advanced tablature

Howard Wallach's "Spanish for Guitar" is an essential book for Spanish guitar enthusiasts. I have been studying and playing classical guitar for 20 years and found the arrangements to be accurate. Asturias-Leyenda, Recuerdos de La Alhambra, Lagrima and Malaguena are included in this 47 page booklet.

This book is really fun to play from. I'm only on the second song and the book is worth it already. These are Spanish pieces, but classical in technique, not flamenco. Easy to play tabs, and standard notation for the rhythm.

One of the few places I was able to find a transcription of "Malagueña". I know it is viewed as uncouth in classical guitar circles to use tablature, but I can learn a piece in about 1/3 the time it would take if I were just looking at score, trying to figure out fingering, etc. It is good to have both. I gave this 4 stars because a few of the pieces (including Malagueña) are "arranged" (shortened, transposed) by Wallach, when the original composer's version would have been fine.

The songs are very easy to play along with the tablature. Unfortunately, it doesn't come with a CD but you can find the songs on youtube or some classical guitar CD. It's cheap and inexpensive but you will have fun playing it. This book basically builds the foundation for classical guitar technique. You can immerse yourself with other level playing styles from other classical guitar books and this one can act as a supplement.

The worst ebook I ever bought. The music might be good but spreading the notes over so many pages (one "line" per page) makes it so impractical. I'm not sure if I can ask for a refund or to replace this ebook with a printed version. As is, it is a waste of money; I should have downloaded the notes as real music sheets for free.

These easy to intermediate pieces are a must for the person who is interested in learning the power of the guitar for projecting the beauty of a piece of music. Beginning guitarist must learn these great pieces! Mr. Howard Wallach is a skillful arranger for the guitar and you should take advantage of his ability!
