Customer Reviews

I follow *That Metal Show* and listened to Eddie Trunk's radio show, I have to give the man credit because he really knows his music inside out. When it comes to metal this guy has been following the genre since its beginnings and he's met Hard Rock and Heavy Metal's biggest legends and talents, he certainly has experience on the topic. Now Eddie releases his own book. I guess I wasn't too sure what to expect but since it was a book on Hard Rock and Metal and that Eddie Trunk was the author of it, that was enough a reason for me to buy it. I was curious enough that I wanted to see for myself what *Essential Hard Rock and Heavy Metal* had to offer. I won't argue with the author's picks and I'll agree that most of these bands are essential listening for a true fan. In fact, I would probably have included many of these bands in my personal "essentials" list. As always some fans are going to criticize and say this or that band should have been included (normal and perfectly

understandable) but there was only so much room in the book even if some great bands have been overlooked. I'm not surprised at the picks and there are obviously a lot of Eddie's favorites like KISS, UFO, Thin Lizzy, Dio and so on. However it seems that there's little room for new bands in Eddie's idea of Hard Rock/Metal. While I myself prefer the classic bands over the ones of today there are still some good bands and musicians that make great music these days that should be talked about. I feel that it would only be normal to also spend some time on bands that carry on this genre of music, just my opinion. Trunk goes by favorites here which is typical and no big deal, I feel that fans would agree that the bands selected are essential and are deserving of a spot here.
